# e-days Absence Management Integration Enhancements

---

This functionality was released with the 21 August 2020 patch.

The following functionality is added to the e-days Absence Management integration available in Edge:

- Define user custom fields on the Settings page and use them to filter out users from being created or updated in e-days.
- Ability to use a 3rd party IdP SSO provider.

To install a new e-days Absence Management Integration, go to **ADMIN > TOOLS > EDGE > MARKETPLACE > E-DAYS ABSENCE MANAGEMENT INTEGRATION**.

Before you can use the e-days Absence Management Integration, you must configure the Settings page in CSOD. To access the Settings page, go to **ADMIN > TOOLS > EDGE > INTEGRATIONS >**. Locate e-days Absence Management Integration and click the **CONFIGURE** button.

## Implementation

---

- The e-days Absence Management enhancements are available by default for HR clients using this integration in Edge.
- For new integrations, the e-days Absence Management Integration can be self-installed and enabled on the Edge Marketplace.
